

Perfect for Transporting and Installing Glass Panels!

***Max. Load capacity 80 kg**

Spac/Model	SL1
Lifting height	150 cm
Max. Load capacity	80 kg
Dimension	117x75x167 cm
Machine Weight	91 kg

Key features include:

- **Capacity** - Ability to lift glass sheets up to 80kg from the horizontal plane for transportation and installation.
- **Doorways** - Glass panels can be maneuvered to the side of the trolley to move through doorways.
- **Installation** - Glass panels, doors and windows can be lifted, tilted and rotated to facilitate installation.
- **Foldable** - for convenient and easy transportation.
- **Solid rubber tyres** for ease of use and grip on building sites.
- **Swivel wheels** - provide a high degree of maneuverability
- **Brake** - Lock the trolley to stop it moving when on a slope or when loading and unloading.

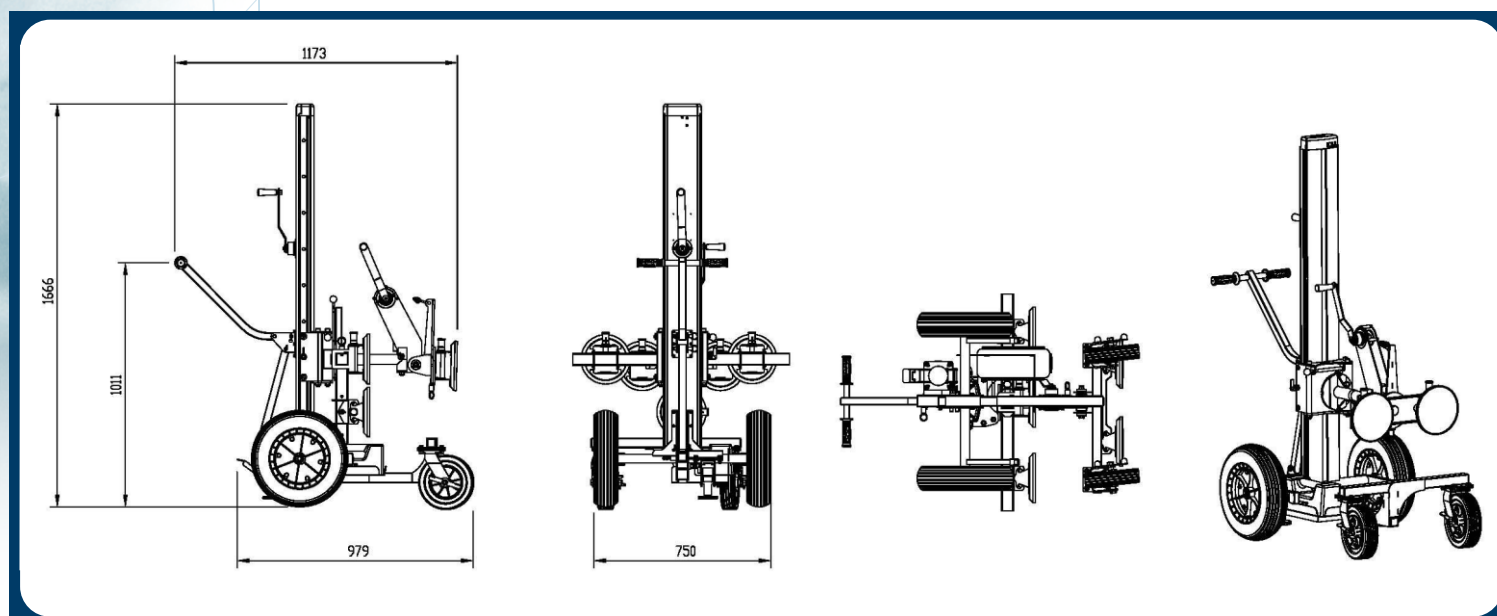

10" Solid wheels

Allows travel over rough surfaces on construction sites.

Detachable Glass Holder

Rotate **360°**, and place horizontally on a working table.

•SL1

Perfect for transporting and handling Glass Panels!

- *Max. Capacity 180 kg
- *Rotate panels up to 240cm

1. Patented Silent winch makes raising and lowering the panel easy and quiet.
2. Hidden Steel wire inside the mast, to protect operator's fingers from pinch points.
3. 16" puncture proof wheels allow you to move glass with confidence on uneven surfaces.

Spec / Model	GT1
Lifting height	160 cm
Max. Load Capacity	180 kg
Max. Rotating glass panel dimension	240cm x 240cm
Packing Dimension	145x56x34 cm
Weight	48 kg
